CODE-RED

FORKLIFT DETECTION WARNING SYSTEM

The Code-Red is a wireless collision avoidance system that offers a simple, inexpensive solution to reducing accidents in the workplace.

Features & Benefits

- Proximity Tag easily installed on any 12-24V forklift or industrial vehicle
- Proximity Detector detects presence of tagged forklift around corners to flash warning lights
- Detector easily mounts on racks, aisleways, walls or any area with high forklift traffic
- 20 – 40 foot programmable detector range and powered with standard 120VAC adaptor
- Detector includes (2) water-resistant LED lights measuring 9 1/2" x 1" x 5/8"
- Forklift Tag draws 150 mA at 12 – 24VDC
- Forklift Tag is shockproof, waterproof and IP68 rated
- Eliminates the need for workers to wear tags
- Works non-line-of-sight; around corners with no blind spots or coverage gaps
