

The Backbone[®] or The Backbone2[®]

Which Backbone is right for you? Measuring Instructions

These instructions are to perform the measurements to determine the model of The Backbone for your reach truck or stand-up forklift.

To perform this measurement, you will need:

- An assistant. This procedure requires two (2) workers.
- Your reach truck or stand-up forklift.
- A straight edge long enough to reach from at least halfway down the body of the forklift to just past the overhead guard.
- A tape measure or small ruler.

Instructions:

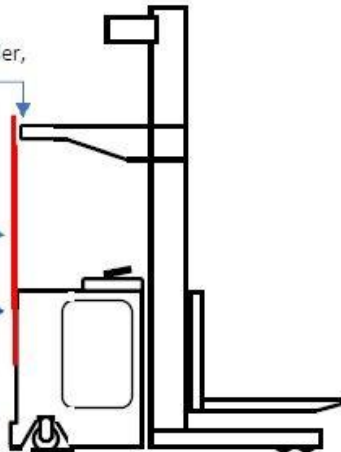

STEP 2:

Using tape measure/ruler,
measure this gap.

Straight
edge

STEP 1:

Hold straight edge flush
against the forklift body.

Which Backbone?

If the gap is one inch (1"), your forklift needs
Backbone™ Protect Forklift Operators SKU: BBRTSCT-B

If the gap is one-half inch (1/2" or 0.5"), your
forklift needs

Backbone™ Stand Up Counterbalance Trucks
SKU: BBRTSCT-2-B
